

San Jose, California's **THE WET BANDITS** are living proof that raw talent, ambition and honesty can still prevail in a music landscape where genres have isolated bands and stifled new creative musical ideas. With voracious ep sales and their growing/loyal fan base, their fast rise is a testament into what this band brings to the table. Instead of picking one genre to focus on, the Wet Bandits combine their lifelong influences of jazz, R&B/Soul and Alternative Rock into a truly original, moving and sonic pulsed sound. Their confidence in songwriting is matched by an "all or nothing" live performance that engage any set of ears and bodies it reaches.
